

CYBERSECURITY AWARENESS FOR THE MARITIME INDUSTRY

MARITIME SAFETY, SECURITY AND ADMINISTRATION COURSES

This course is intended for sea-based and office-based officers and staff. The training provides the essential aspects of cybersecurity when applied in the Maritime Industry. It covers proactive approaches in awakening and/or raising the awareness level (if none) of the participants on various cyber risk threats and vulnerabilities present in our current setting.

COURSE AIMS & OBJECTIVES:

The course aims to provide applied knowledge and rational understanding of cybersecurity threat identification & appropriate control and/or mitigation techniques that shall enable participants to uncover and identify potential and significant threats and take cost effective measures to treat and minimize their risks before any losses occur.

COVERAGE / PROGRAM FOCUS:

The course deals with the following lessons and training areas:

Introduction	-	Historical Background
	-	Overview on “IMO Guidelines on Maritime Cyber Risk Management”
Components of Security	-	Physical Security
	-	Personnel Security
	-	Information Security
Cybercrime Dimension	-	Common Categories of Cyberattacks
	-	Impacts of Cybercrimes
	-	Prevention Techniques
Behavioral Dimension	-	Addressing Behavioral Challenges
	-	Awareness, Motivation, Capability Perspective

METHOD: Combination of lecture and interactive class discussion reinforced with case study/workshop that can be applied on both sea-based and office-based setting.

ENTRY REQUIREMENT / TARGET GROUP: Entry to this course is open to all shipboard officers and crew, as well as office managers and staff.

COURSE CERTIFICATE: A **Certificate of Completion** shall be given to each participant who satisfactorily fulfills the Course and its Assessment.
